OVERVIEW

- Innovative optimized solution seeker. Eager to learn new technology, and be able to work under high pressure. I can work in an English working environment. I love coding beautiful and helpful web. Programming is my passion and my career-developing goal.
- I am a dynamic and enthusiastic person, always with a progressive spirit, eager to learn and discover new things. Although my expertise is in programming, I still love design tools and photo editing.
- My short-term goal is to try to practice at the company, acquire training and work in a professional environment.
- My long-term goal is to become a professional web developer, meanwhile, I will try to expand my foreign languages!
- Java is my first programming language at University. Then I studied many things related to this major such as Databases, Web development, etc. Furthermore, I studied Software analysis and design, Software Requirements, Project Management, and Information System Design.. which

SKILLS

- **LANGUAGE:** English (B2-C1)
- **PROGRAMMING:** HTML, CSS, JavaScript, SCSS, BEM, Java, PHP, NodeJS
- **DATABASE:** MySQL, MongoDB, MariaDB
- **FRAMEWORK:** ReactJS, Bootstrap

- **SOFT SKILLS:** Teamwork and Collaboration skills, Critical thinking, Problem-solving skills, Adaptability, Email writing.

EDUCATION

Ha noi University (SEP 2019 > NOV 2023)

Department: Faculty of Information Technology learning in English
BACHELOR'S INFORMATION SYSTEM

PROJECTS

Ecommerce Website for Selling Cosmetic (Jan 2023 > May 2023)

Frontend- Team of 4

- React, Springboot
- SDLC: Agile Scrum with 3 iterations.
- Build an e-commerce website using the framework. This is a educational project we have done on Spring 2023! We have to use ReactJS for front-end and Springboot for back-end. In this project, I have responsibility for front-end part. I had built the codebase for the project, build the UI using API from back-end. My flow of work is: implement the product page, cart page, checkout page, and modify the style, responsive of the whole UI.
- Demo: <https://youtu.be/SALLKFxiY0>

Ecommerce Website for Selling Wooden Decorations (Jan 2022 > May 2022)

FullStack

- PHP, MySQL
- SDLC: Agile Scrum with 3 iterations.
- Build an e-commerce website from scratch with a real customer. My role in this project is to build and modify the UI, implement the product page, cart page, checkout page, and modify the style, and responsiveness of the whole UI. Build the database and connect to backend using PHP and Xampp. Otherwise, I also joined in writing document like User Story,
- Source Code: <https://github.com/LAP200I/Hem-Decor-web.git>

Landing page (April 2023 > May 2023)

Individual work

- JavaScript, HTML, CSS, Bootstrap
- I create my own landing page and deploy it to github.io. I use many animations and techniques to build this website, make it more attractive.
- Demo: <https://lap200i.github.io/mypro5/>

Quiz App API (Nov 2022 > Dec 2022)

FullStack - Individual work

INTERESTS

- Sport
- Drawing
- Listening podcast
- Movie

AWARDS

The Third Prize of Private Codewars at FPT
Software by Javascript
(Feb-2023)

- JavaScript, HTML, CSS, MongoDB, NodeJS
- I create my own server APIs and quiz app that fetches data from APIs.I use NodeJS for the back-end and MongoDB for the database.
- Frontend: <https://github.com/LAP200I/QUIZ-APP-API>
- Backend: <https://github.com/LAP200I/BACKEND-API.git>

Course Management Program (Nov 2022 > Dec 2022)

FullStack - Individual work

- Java, SQLite
- Big Assignment
- Create a GUI for managing courses, students, and enrolments using Java's Swing API and use SQLite for the database.
- Demo: https://youtu.be/7kJiuCZJ_SA

EXPERIENCE

NodeJS Intern (FEB-2023 > MAR-2023)

Position: Intern NodeJS trained by FSoft Academy- FPT

Description: I had 1-month of training at Fsoft Academy about web programming, understand the business skills, deeply understand web programming (HTML,CSS,JS,BOOTSTRAP ...).
